INTRODUCTION

- ❑ Recall that farm tools are equipment used in carrying out the routine husbandry practices in crops and animals.
- ❑ Tools and equipment are designed to perform a particular task on the farm so it is important to choose the right tool for the right job.

BE TRUE

CLASSIFICATION OF FARM TOOLS AND EQUIPMENT

- ❧ Farm tools and equipment are classified into;
- ❧ A) GARDENING TOOLS.
- ❧ B) MILKING EQUIPMENT.
- ❧ C) LIVESTOCK MANAGEMENT HANDLING TOOLS
- ❧ D) FARM WORKSHOP TOOLS.
- ❧ E) POULTRY MANAGEMENT EQUIPMENT.

GARDENING TOOLS

These are tools and equipment that are used in the routine agronomic practices on the farm like land preparation, planting, weeding, pruning, manure preparation and application, harvesting etc.

Examples are;

hand hoe, forked hoe, gardeners trowel, spade, garden fork, shovel, rake, manure fork, wheelbarrow, watering can, dibber, pangas, pickaxe, slasher, sicles, pruning knives, axe, tape measure, secateur, planting line, Knapsac sprayer
